

CONTENTS

• **Vial 1:**
Lyophilized Powder

• **Vial 2:**
Activating Liquid

PURPOSE:

This product is supplied in two separate vials. Prior to use, the contents of Vial 1 (powder) must be reconstituted with the contents of Vial 2 (activating liquid) to form a ready-to-use solution or suspension.

SUPPLIES NEEDED

- 5cc syringe
- 20 guage needle
- cotton swabs
- rubber gloves

PREPARATION INSTRUCTIONS:

1 INSPECT BOTH VIALS

Ensure both vials are intact, within their expiration dates, and free of particulate matter or discoloration.

2 RECONSTITUTION STEPS:

- Sanitize the rubber stoppers on both vials with an alcohol swab.
- Using a sterile syringe and needle, withdraw the full contents of Vial 2 (activating liquid).
- Slowly inject the activating liquid into Vial 1 (lyophilized powder). Aim the stream toward the side of the vial to avoid foaming.
- Do not shake the vial. Gently swirl or roll the vial between your fingers until the powder is fully dissolved and the solution appears clear or uniformly mixed.
- Allow the mixture to stand for 1–2 minutes to ensure complete reconstitution.

3 INSPECT FINAL SOLUTION

- Visually inspect the reconstituted product for any particulate matter or discoloration.
- Use immediately
- Store any remaining liquid under refrigerated conditions for up to 7 days.

ADMINISTRATION INSTRUCTIONS:

- Administer the product per your provider's protocol or as indicated on the label.
- Use aseptic technique throughout preparation and administration.
- Discard any unused product according to local regulations and institutional policies.

WARNINGS AND PRECAUTIONS:

- For single use only.
- Do not use if either vial is damaged or shows signs of contamination.
- Do not substitute the diluent with any other fluid unless directed by the manufacturer.
- Keep out of reach of children.

STORAGE INSTRUCTIONS:

- Store both vials according to the product's labeled temperature requirements (68°F to 77°F (20°C to 25°C) or room temperature).
- Do not freeze.
- Protect from direct sunlight.
- store any unused material in the refrigerator for up to 7 days
